DETAILED ACTION

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Allen Lowe on 3/29/2006.

As to claim 1, line 12, the word "the" should be added before the phrase "extracted phase information" in order to overcome the indefiniteness in the claim.

Allowable Subject Matter

Claims 1-8 and 10-19 are allowed. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach recovering a clock signal from a received input signal; sampling and digitizing said recovered clock signal to produce a series of digital clock samples; processing said digital clock samples digitally with reference to a local digital reference signal to produce digital baseband frequency inphase and quadrature components; processing said digital phase information to extract digital phase information of said clock signal; processing said digital phase information to

determine a parameter of the electronic system; and controlling the phase of said local digital reference signal in response to the extracted phase information as part of a phase locked loop.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
